EDUCATION

- 2023 - present **Uppsala University**, Sweden
Doctoral study in Pharmacokinetics and Pharmacodynamics
- 2012 - 2013 **King's College London**, United Kingdom (*Graduated with distinction*)
MSc in Pharmaceutical Analysis and Quality Control
- 2008 - 2012 **Shanghai University of Traditional Chinese Medicine**, China
BSc in Pharmacy

RESEARCH EXPERIENCE

- Mar 2023 - present **Pharmacometric modeling for developing antibiotic therapies via pulmonary delivery**
Uppsala University, Department of Pharmacy
Supervised by *Prof. Lena Friberg, Prof. Elin Svensson*
- Established a translational PBPK model framework to characterize intrapulmonary PK in rats and humans after pulmonary delivery, in collaboration with AstraZeneca.
- To develop a predictive translation framework for gallium-based nanoengineered antimicrobial therapy targeting pulmonary delivery, in collaboration with Karolinska Institutet.
- Sep 2021 - Jan 2022 **Evaluation of bleeding risk increase due to drug-drug interaction of dronedarone as with physiologically based pharmacokinetic and pharmacodynamic modeling**
Shanghai Chest Hospital, Shanghai, China
- May 2013 - Sep 2013 **Target-mediated drug disposition (TMDD) modeling of a novel monoclonal antibody in monkeys to aid dose selection and PK sampling for its Phase I study**
Shanghai Chest Hospital, Shanghai, China
- Consultancy project in collaboration with *GenSci Pharm*

PROFESSIONAL WORK EXPERIENCE

- Aug 2020 - Jan 2023 **Senior clinical pharmacist, Department of pharmacy**
Shanghai Chest Hospital, Shanghai, China
- Established and developed the perioperative clinical pharmacy service in the cardiovascular surgery unit.
- Mentored and precepted new pharmacy staff, supporting their clinical and professional development.
- In-charge pharmacist of multi-disciplines clinic of venous thrombosis diseases:
Provided individualized dosing of warfarin and novel anti-coagulants.
Provided medication counselling and Medication Therapy Management service.
- Jan 2014 - Jul 2020 **Clinical pharmacist, Department of pharmacy**
Shanghai Shu Guang Hospital, Shanghai, China

TEACHING EXPERIENCES

- Mar 2023 - present **Teaching assistant**, Uppsala University, Department of Pharmacy
- Supervising master student dissertations
- Delivering teaching sessions on Modelling of biological systems, Clinical trial methodology, Pharmacokinetics.
- Help develop new course Pharmacokinetics and pharmacodynamics for bachelor education

- Mar 2023 - **Guest lecturer**, MSc Clinical pharmacy, Fudan University, China
 present - Delivered seminars on translational PK/PD modelling
- Mar 2023 - **Teaching assistant**, Uppsala pharmacometrics summer school, Uppsala University
 present - Delivering multiple hands-on sessions
 - Organized summer school social programme (2023)

PUBLICATIONS (selected)

- 2025 **Wen H**, Sadiq MW, Friberg LE, Svensson EM. A pulmonary population PBPK model for sampling design evaluation, Page Abstract. 2025: <https://www.page-meeting.org/default.asp?abstract=11747> (manuscript under review).
- 2025 **Wen H**, Sadiq MW, Friberg LE, Svensson EM. Translational physiologically based pharmacokinetic modeling to predict human pulmonary kinetics after lung delivery. CPT Pharmacometrics Syst Pharmacol. 2025 Apr;14(4):796-806.
- 2022 **Wen HN**, He QF, Xiang XQ, Jiao Z, Yu JG. Predicting drug-drug interactions with physiologically based pharmacokinetic/pharmacodynamic modelling and optimal dosing of apixaban and rivaroxaban with dronedarone co-administration. Thromb Res. 2022 Oct;218:24-34.
- 2021 **Wen HN**, Liu YX, Xu D, Zhao KJ, Jiao Z. Population pharmacokinetic modeling of pyrotinib in patients with HER2-positive advanced or metastatic breast cancer. Eur J Pharm Sci. 2021 Jan 21;159:105729.

CONFERENCES AND PRESENTATIONS

- Informing sampling design for lung distribution studies using a pulmonary population PBPK model, *Oral presentation*, ICAComp 2025 October
- A pulmonary population PBPK model for sampling design evaluation, *Poster presentation*, PAGE 2025 June
- Translational physiologically based pharmacokinetic modeling to predict human pulmonary kinetics after inhalation, *Poster presentation*, PAGE 2024 June
- Predicting drug-drug interaction with physiologically based pharmacokinetic/pharmacodynamic modelling and optimal dosing of oral anti-coagulants with dronedarone co-administration, *Oral presentation*, Asian Pharmacometrics Network Symposium 2022 Nov

LANGUAGE AND SKILLS

- Modelling software: NONMEM, PKSIM and OSP, SimCyp, Monolix
- Programming language: R, Python; Machine learning: scikit-learn, PyTorch (regression, classification, neural networks)
- Language: Mandarin (native), English (fluent), Swedish (intermediate)

GRANTS

- Jun 2025 **Uppsala Antibiotic Center**, travel grant
- Nov 2024 **Småland Nation**, travel grant
- Jan 2021 - **Shanghai Municipal Health Commission**
 Feb 2023 Shanghai "Rising Stars of Medical Talents" Youth Development Program-Youth Medical Talents: Clinical Pharmacist Program

AWARDS AND HONORS

- 2019 Shanghai Outstanding Clinical Pharmacist Award -Shanghai Medical Association
- 2013 Lingard Prize: Best student in pharmaceutical analysis and quality control - King's College London
